

BREAKING *the* SILENCE

DAVAO REGION

END VIOLENCE AGAINST WOMEN

The NDHS 2017 included a Women's Safety Module designed to collect information on domestic violence. Only one eligible woman per household was selected to receive this module. In households with more than one eligible woman, one respondent was randomly selected. The module can be administered only if complete privacy can be obtained; among the women eligible, less than 1% could not be interviewed because privacy could not be attained.
