Technical Notes

Consumer Price Index (CPI) is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

Inflation Rate is the annual rate of change or the year change of the CPI expressed in percent. Inflation is interpreted in terms of declining purchasing power of money.

Purchasing Power of Peso (PPP) shows how much the peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.
