What is Consumer Price Index (CPI) ?

The CPI is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

What are the uses of CPI ?

Inflation Rate

Purchasing Power of Peso

Indexation of Wages

Indicator of economic performance

What is Inflation Rate (IR) ?

The inflation rate is the annual rate of change or the year-on-year change of the CPI expressed in percent. Inflation is interpreted in terms of declining purchasing power of money.

What is the purchasing power of the peso?

The purchasing power of the peso shows how much the peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.
