### 2. Food Inflation

The Food inflation for the Bottom 30% Income Households in the city decreased to 0.9 percent in April 2025 from 1.7 percent in the previous month. The decrease was mainly due to a) Cereals and cereal products at negative 6.3 percent, from negative 4.0 percent in the previous month. This was followed by b) Vegetables, tubers, plantains, cooking bananas and pulses at 4.2 percent, from 10.5 percent in the previous month; Also, c) Meat and other parts of slaughtered land animals at 5.5 percent, from 6.8 percent in the previous month; d) Ready-made food and other products at 4.6 percent, from 7.3 percent in the previous month; and, e) Fruits and nuts at 3.4 percent, from 6.3 percent in the previous month.

Reference No. SR-2025-05PSO24-021 Summary Inflation Report of Davao City, Consumer Price Index, Bottom 30% Income Households, (2018=100): April 2025 08 May 2025

In contrast, increasing rates in food inflation were observed in the following food commodities:

- a) Fish and other seafood at 9.1 percent, from 5.0 percent in the previous month;
- b) Milk, other dairy products, and eggs at 4.2 percent, from 2.3 percent in the previous month;
- c) Oils and fats at 18.4 percent, from 9.1 percent in the previous month; and
- d) Sugar, Confectionery, and Desserts at negative 0.1 percent, from negative 1.6 percent.

#### **Technical Notes:**

**Consumer Price Index (CPI)** - The CPI is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

**Inflation Rate (IR) -** The inflation rate is the annual rate of change, or the year-on-year change of the CPI expressed in percent. Inflation is interpreted in terms of declining purchasing power of money.

**Bottom 30% Household -** Families that belong in the low-income bracket and the most vulnerable to economic and social difficulties. Based on the "relative poverty" concept, a household whose per capita income falls below the bottom 30% of the cumulative per capita distribution belongs to the low-income group.

One of the common characteristics of households in this income group is that expenditures on food items account for a more substantial proportion of expenditures compared to expenditures on other items. Price changes in food, therefore, would be expected to greatly affect this income group more than any other group.

**Headline Inflation** - measures changes in the cost of living based on movements in the prices of a specified basket of major commodities. It refers to the annual rate of change or the year-on-year change in the Consumer Price Index (CPI).
