1. Regional Headline Inflation

The year-on-year headline inflation of Davao Region declined to 4.3 percent in June 2024, from 5.3 percent in May 2024. In June 2023, the region's inflation was higher at 5.7 percent. (Table 1 and Figure 1).

The major contributor to the region's overall inflation trend in June 2024 was the commodity group of Food and Non-Alcoholic Beverages at 7.5 percent from 8.8 percent in the previous month. Also, the commodity groups of Housing, Water, Electricity, Gas, and Other Fuels, at -2.9 percent from -1.1 percent, and Transport, at 3.2 percent from 4.5 percent, contributed to the region's overall inflation downtrend.

Moreover, lower annual increments were noted in the indices of the following commodity groups during the month:

- a. Alcoholic Beverages and Tobacco at 5.2 percent from 5.4 percent;
- b. Health at 4.0 percent from 4.4 percent;
- c. Information and Communication at -0.3 percent from -0.2 percent;
- d. Recreation, Sport, and Culture at 4.5 percent from 4.9; and
- e. Restaurants and Accommodation Services at 6.2 percent from 6.6 percent.

On the other hand, three commodity groups recorded faster annual growth rates during the month, to wit:

- a. Clothing and Footwear at 4.8 percent from 4.6 percent;
- b. Furnishings, Household Equipment, and Routine Household Maintenance at 4.7 percent from 4.5 percent; and
- c. Personal Care, and Miscellaneous Goods and Services at 4.9 percent from 4.4 percent.

Meanwhile, Education Services at 4.0 percent and Financial Services at -0.1 percent retained its previous month's inflation rate.

TECHNICAL NOTES

Consumer Price Index (CPI)

The CPI is an indicator of the change in the average prices of goods and services commonly purchased by consumers.

Uses of CPI

The CPI is most widely used in the calculation of the inflation rate and purchasing power of peso. It is a major statistical series used for economic analysis and as a monitoring indicator of government economic policy.

Computation of CPI

The computation of the CPI involves consideration of the following important points:

a. Base Period

Base year is a reference period, usually a year, at which the index number is set to 100. It is the reference point of the index number series. The CPI is rebased from the base year 2012 to the base year 2018.

b. Market Basket

Market basket refers to a sample of goods and services commonly purchased by households.

c. Weighting System

The weighting pattern uses the expenditures on various consumer items purchased by households as a proportion of total expenditure.

d. Formula

The 2018-based CPI series uses the same method of computation as the 2012-based CPI series, which is Chained Laspeyres formula.

e. Geographic Coverage

CPI values are computed at the national, regional, and provincial levels, and Highly Urbanized Cities.

Inflation Rate is the rate of change of the CPI expressed in percent. Inflation is interpreted in terms of the declining purchasing power of peso.

Headline Inflation refers to the rate of change in the CPI, a measure of the average standard "basket" of goods and services consumed by a typical family.

Purchasing Power of Peso shows how much the peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.
