SPECIAL RELEASE

2024 FRUIT CROPS SITUATIONER: DAVAO REGION

TECHNICAL NOTES

The data from this Special Release was based on the **Crops Production Survey (CrPS)**. It is a quarterly survey which aims to generate basic production statistics for crops other than palay and corn at the national and sub-national levels. It covers more than 280 crops sub-classified under three commodity groupings, namely: 1) Non-Food and Industrial Crops, 2) Fruit Crops, and 3) Vegetables and Rootcrops. The commodity coverage by province differs and depends on what each province produces.

Crop Production is the quantity produced and actually harvested for a particular crop during the reference period. It includes those measured but damaged, stolen, given away, consumed, given as harvesters' and threshers' shares, reserved etc. Excluded are those produced but not harvested for whatever reasons such as due to low price, lack of demand and force majeure or fortuitous events, etc.

CrPS survey results are posted at the PSA website (<https://openstat.psa.gov.ph>)
