Aging Index

In Kapalong, the aging index or the proportion of persons aged 60 years old and over per 100 persons under the age of 15 years old was computed at 21.3 percent in 2020. This means that, approximately, there is one person aged 60 years old and over for every five children under 15 years old.

Technical Notes

Household

A social unit consisting of person or a group of persons who sleep in the same housing unit and have a common arrangement in the preparation and consumption of food.

Household Population

This refers to all persons who are members of the household.

Sex Ratio

It is the number of males per one hundred females in population.

Median Age

It is the age that divides the population into two numerically equal groups; that is, half of the population are younger than this age and the other half are older.

Overall Dependency Ratio

It is the number of persons under 15 years old (young dependents) and persons aged 65 and older (old dependents) per one hundred persons 15 to 64 years old (working-age or economically-productive group) in a population.

Aging Index

It is calculated as the number of persons 60 years old and over per one hundred persons under the age of 15 years old.
